

Two types of artificial intelligence

Get AI working for you today with pre-built solutions
or build out a custom solution around your unique needs

Pre-built

Cognitive services

**Transform your engagements
with customers and employees:**

Pre-trained deep learning cognitive capabilities ready to use (vision, speech, knowledge, translation, etc.)

of customer interactions to be powered by AI bots by 2025

Custom

Advanced analytics/ML

**Leverage AI to get actionable
insight from your data:**

Machine learning capabilities to analyze data (clustering, regression, etc.)

of applications included AI by the end of 2019

Deep learning

**Leverage AI to create the future
of business applications:**

Build and train artificial neural networks to address specific problems not covered by cognitive services

of enterprises are using AI by 2020
