

Azure App Service

A fully-managed platform for building, deploying, and scaling your web apps.

Enabling productivity and innovation for more than 2 million apps and sites on Azure.

Quickly build, deploy, and scale web apps and APIs on your terms. Work with .NET, .NET Core, Node.js, Java, Python, and PHP—in containers or running on Windows or Linux. Meets rigorous, enterprise-grade performance, security, and compliance requirements. Uses a trusted, fully-managed platform that handles more than 40 billion requests per day.

Fully-managed platform

Built-in infrastructure maintenance, security patching, and scaling.

Built-in CI/CD integration

CI/CD integration provides zero-downtime deployments.

Virtual network integration

Ability to run in an isolated and dedicated **App Service environment**.

Rigorous security and compliance

Seamless deployments across public cloud, Azure Government, and on-premises environments.
