

Azure Workloads for Azure Virtual Desktop

Microsoft Azure Virtual Desktop is a flexible cloud VDI platform for secure, customizable virtual desktop and app solutions on Azure—supporting remote work for a hybrid workforce.

The service can support customers who already have a Microsoft Azure cloud infrastructure, as well as those about to embark on their journey with Azure using the existing Azure Cloud Foundation offering.

Two adoption paths with the same outcomes

Capabilities

- Deploy and scale in minutes**
Virtualize and deploy modern and legacy desktop and app solutions in minutes with unified management in the Azure portal.
- Enable optimizations for Microsoft 365 apps for enterprise**
Azure Virtual Desktop delivers the best Microsoft 365 apps for enterprise experience with multi-session virtual scenarios to provide the most productive virtualized experience to your users.
- Delivers the only multi-session Windows 10/11 experience**
Azure Virtual Desktop provides the only multi-session Windows 10 and Windows 11 virtualization in the cloud that's highly scalable, provides cost savings, always up to date, and available on any device.
- Stream apps to deliver SaaS to your customers and employees**
Remote app streaming with Azure Virtual Desktop enables organizations to stream apps to employees through your existing license and to customers with a new monthly per user pricing.
- Manage with first-party, Citrix, or VMware**
Choose your preferred management solution to meet your desired performance, hybrid, and security requirements.
