

Build custom Teams solutions with low-code tools

Develop apps, automated workflows, and dashboards with Power Platform and use them in Teams.

Used by business big and small

Building apps that save money

A small team with no previous app development experience created auditing apps that saved the company \$500,000.

Installing efficiency and cost savings

One employee created 40 apps that boosted the productivity of 3,000 field technicians and brought \$40,000 in savings.

Engineering innovation

France's national railway improved maintenance procedures and incident reporting by enabling employees to create more than 150 apps.
