Microsoft

Create a connected guest experience
with Microsoft technology
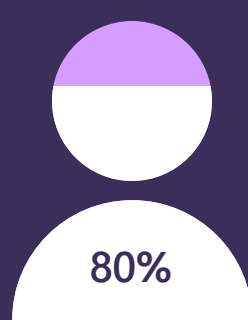

In an increasingly teamwork-centered workplace,
technology is more important than ever.

86%

86% of executives and employees blame a lack of teamwork or bad communication for team problems and failures.[1]
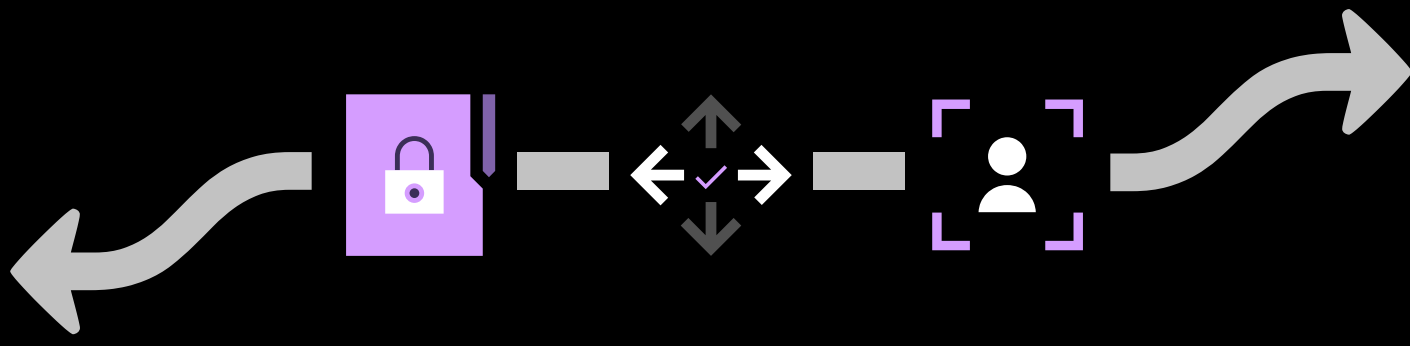

45%

45% of respondents reported that social technologies are very or extremely integrated into day-to-day work at their companies.[2]

80%

80% of employees reported that they communicate more often with others in teams, functions, or business units using social technologies.[2]

Businesses face challenges when trying to provide a secure guest experience, such as:
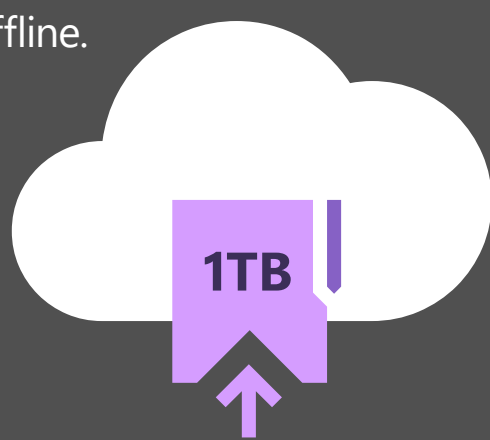

Securing and preserving company data when sharing information with external users.

Keeping track of who has what information.

Distinguishing between the information external users can and can't access.

Teamwork solutions from Microsoft enable secure, cloud-based teamwork.

- Access documents virtually anywhere, online or offline.
- Work together in a single document that's always up to date.
- Seamlessly share large files.
- Use built-in chat functionality to discuss edits within a document.
- Cloud-based email technology allows you to work more flexibly and communicate in real time with co-workers and external users.
