

A modern focus on enterprise protection

Sharing information with trusted parties inside and outside your organization is crucial to succeed in today's digital world; but doing so also introduces the risk of losing sensitive data.

To fully protect your organization, **Microsoft 365 E5** is designed to give you complete oversight and control of your key business data:

Secure your 3rd party cloud apps

Scan and classify your on-premises data

Keep data safe outside of your organization

Set automated data security policies

Identify potentially sensitive information

To learn more about the robust security and productivity features available in Microsoft 365 E5, [visit our website](#).
