

Help customers work from almost anywhere, on any device, with Microsoft technology

The landscape for the modern workplace is evolving.

37% of the global workforce is mobile.¹

More than 50% of employees report that mobile technology helps them achieve work-life balance by enhancing productivity.²

68% of businesses allow employees to use personal devices for work purposes.²

While teams are evolving to a mobile workstyle, companies struggle to find the right technology to enable seamless mobility. Teamwork solutions from Microsoft allow you to:

Enable remote workers.

Reduce overhead.

Enhance mobility within the company.

Microsoft technology helps facilitate teamwork.

Integrate team chats, meetings, and files in one place to increase productivity.

Enable teams to work together on documents to rapidly advance ideas and innovation.

Connect the tools and services employees use every day in a single hub with Microsoft technology.

Now, with Microsoft technology, you can:

Enable employees to work remotely by making chat, meetings, notes, documents, and apps available to team members anytime and anywhere.

Reduce overhead by saving money on office space as employees are able to work remotely.

Enhance mobility and productivity by allowing employees to easily and access teamwork tools from any device.

Achieve more in your business with an integrated Teamwork solution.

Connect and work together with customers, co-workers, and suppliers.

Bring teams and resources together.

Design a flexible work schedule by being able to work remotely.

Get started today by taking the [Microsoft Teamwork Assessment Workshop](#).
