Is your email system as advanced as its attackers?

New exploits come out faster all the time.
Office 365 Advanced Threat Protection helps you stay ahead.

$4 Million
Average cost of data breach[1]

$1 Billion
Losses from ransomware in 2016[2]

4,000
Ransomware attacks per day in 2016[3]

$500 Billion
Total global cost of cybercrime[4]

Advanced Threat Protection defends against **unknown** threats **before** they can compromise your data.

ATP protects you in three ways:

Safe Attachments
Provides zero-day protection against unknown malware

Safe Links
Offers time-of-click protection against phishing sites

Rich Reporting
Supports investigation and tracking of malicious traffic

When a message comes in to Office 365 with ATP...

Office 365

Exchange Online Protection applies multiple filters and antivirus engines.

Dynamic delivery eliminates latency by delivering other message contents while attachments are analyzed.

Safe Attachments detonates suspicious attachments in a secure sandbox environment. Unsafe attachments are removed.

ATP intelligence cycles back to improve malware desection in Exchange.

Safe Links rewrites suspicious links for testing at time of click.

ATP rich reporting and tracking features provide actionable intelligence on the threats you face: types, targets, and actions taken.
