Microsoft

Microsoft Dynamics 365
Healthcare Accelerator

Unlocking rapid progress with unified data

Discover how the Dynamics 365 Healthcare Accelerator can unite your data and improve healthcare systems holistically.

You're responsible for providing the best patient care experience, while still generating revenue and responding to the rapidly changing healthcare environment.

Whether you're trying to improve your front door experience, streamline operations, or create additional revenue streams in home health, the Healthcare Accelerator was designed with your needs and challenges in mind.

Microsoft's holistic solution supports the entire patient journey to help you achieve four critical goals.

The Healthcare Accelerator connects your Dynamics 365 health solutions to your EHR and other data sources to help you:

Enable personalized care

With the Healthcare Accelerator, you gain a 360-degree view of the patient journey to optimize care plans. You also improve communications and empower your patients with easy-to-access portals.

Improve operational outcomes

From efficiently ordering medical supplies to effectively managing surgery scheduling, unified data delivers the insights you need to reduce waste. When finance and operations teams are armed with end-to-end patient data and predictive analytics, they can better understand what practices drive the most value.

Reimagine healthcare

Rise to the challenge of addressing the disparate needs of diverse populations with segmented messaging and outreach that will deliver personalized care experiences and improved outcomes.

Empower care teams

Standardize procedures and increase collaboration. Gain access to real-time data insights, along with useful productivity tools. When your staff is more productive they become better engaged, and retention rises.

Security in the Cloud

The Microsoft Healthcare Accelerator keeps your data secure and fully supports the following regulatory standards:

- GDPR
- HIPAA
- HITRUST

"Microsoft helps us capture data from every engagement and use it to improve processes and inform future engagements."

TOM PACEK
CIO, INSPIRA HEALTH NETWORK

> "A patient has an average of 15,000 unique data points during a hospitalization. It has become increasingly clear that current generation electronic medical records have a hard time in surfacing the right information at the right time."
>
> *VISH ANANTRAMAN*
> *CHIEF INNOVATION ARCHITECT,*
> *NORTHWELL HEALTH*

## The Healthcare Accelerator includes:

- 45+ pre-defined healthcare entities
- Pre-built dashboards and workflows
- 200+ data source connectors
- Dynamics 365, Office 365, and Azure integration

Designed for fast and easy application development

The Healthcare Accelerator unlocks the full potential of your data through interoperability and integration of the EHR and other systems.

Together with Microsoft's comprehensive cloud platform, the Healthcare Accelerator is a foundational part of your healthcare system. It allows solutions to be modern, unified, adaptable, and intelligent, including additional future solutions that are built on top of it.

A complete, integrated solution to improve healthcare.
