

# Shift to a modern desktop

Surface and Microsoft 365 give you our most productive and secure experience yet

## Get ready for Windows 7 end of support

After January 14, 2020, Windows 7 devices will no longer receive security updates and support—which means it's the perfect time to switch to Windows 10.

As Microsoft's most secure and user-friendly operating system to date, Windows 10 delivers dynamic features, efficiency, and a new level of usability. Upgrade your system now and avoid needless security exposure while taking advantage of new functionality for the modern workplace.

### Step forward with the latest generation of Surface

Thanks to Surface, it's easier than ever to shift to a modern desktop. Surface devices aren't just preloaded with Windows 10—they're designed around it, creating a truly powerful package. With Surface, you can enjoy ultra-light portability, intuitive navigation, longer battery life and speeds up to 87% faster.

### Simplify the shift with zero touch deployment

With zero touch deployment, Surface devices are ready to go as soon as they arrive. There's no need for your IT team to spend hours manually imaging devices, or for your employees to waste time getting set up—as soon as the box is open, they can start working.

## Surface Pro 6 for Business

### A more powerful Pro

The Pro is a light, portable laptop and tablet in one.

## Benefits of shifting to a modern desktop

### Achieve more

- See enhanced productivity with Microsoft 365 and Surface – powerful hardware and software designed to work together.
- Securely work with mobile computing from anywhere with always-connected LTE or Wi-Fi, and extended battery life.
- Achieve more with better remote meetings and collaboration made possible by best-in-class cameras, mics, and speakers.
- Get employees up and running quickly and easily with deployment tools and dashboards.

### Streamline security

- Protect against security threats and safeguard company data with Microsoft 365 and Surface.
- Find peace of mind with automatic updates to the latest Windows 10 security features.
- From employees signing in with Windows Hello, to IT encrypting security with UEFI firmware drivers, your company data is secure.
- Adhere to the standards for highly secure Windows 10 devices and implement every advanced Microsoft security feature when you deploy Surface.

### Inspire employees

- Invest in your people with beautifully designed hardware they're proud to use.
- Empower employees with devices that adapt to all the ways they work, from tablets on the factory floor to powerful laptops on the go.
- Enable people to work naturally through touchscreens, inking with Surface Pen, and Surface Dial.
