

Create unparalleled remote work experiences with Surface and partner devices

Ensure productivity while working or learning remotely

Digitally transform a new world of work

Deploy, manage, and secure endpoints in a remote work infrastructure

- Set your team up for success by providing a platform for collaboration with crystal clear audio, 4K+ video, and enterprise grade security
- Curate the best user experience with form factor design and feature innovation
- Enhance and customize workflows by choosing from a library of partner devices

- Facilitate intuitive interactions with natural interfaces like ink and touch
- Optimize performance with the Surface Book 2 foldable display and extended battery life
- Remotely deploy and configure devices in a zero-touch process
- Optimize communication at every level to deliver 'best-in-class' video-calls/conferencing via Teams

- Securely manage firmware settings at a boot level with SEMM
- Empower IT professionals to prepare UEFI configurations and protect against tampering or removal
- Employ chip-to-cloud security

Surface and Partner Devices with Microsoft
