

# Connect your team and transform your workplace collaboration in one secure hub

Enhance virtual communication through chats, meetings, and calls

Collaborate and build with deeply integrated apps

Customize and extend with 3<sup>rd</sup> party apps, processes, and devices

Work in confidence using enterprise-grade security

- Streamline communication with threaded, persistent, and contextual chat
- Communicate across geographies securely
- Host 1:1 chats, group conversations, and virtual events
- Drive meaningful collaboration with intelligent meetings and find related files or chat histories at your fingertips

- Integrate existing applications or build from scratch with low code tools to drive productivity and develop custom solutions
- Drive a culture of collaboration by sharing and co-authoring files in app
- Create workflows, add bots, and automate routine tasks

- Access conversations, files, and tools from anywhere
- Discover a library of partner apps for off-the-shelf access to useful features
- Leverage easy integration with your favorite tools across Office 365 – utilize SharePoint, OneNote, Power BI, and Planner integration

- Protect your work with a global hyper scale cloud
- Ensure compliance and governance
- Utilize built-in information protection
- Enable secure access with multi-factor authentication
